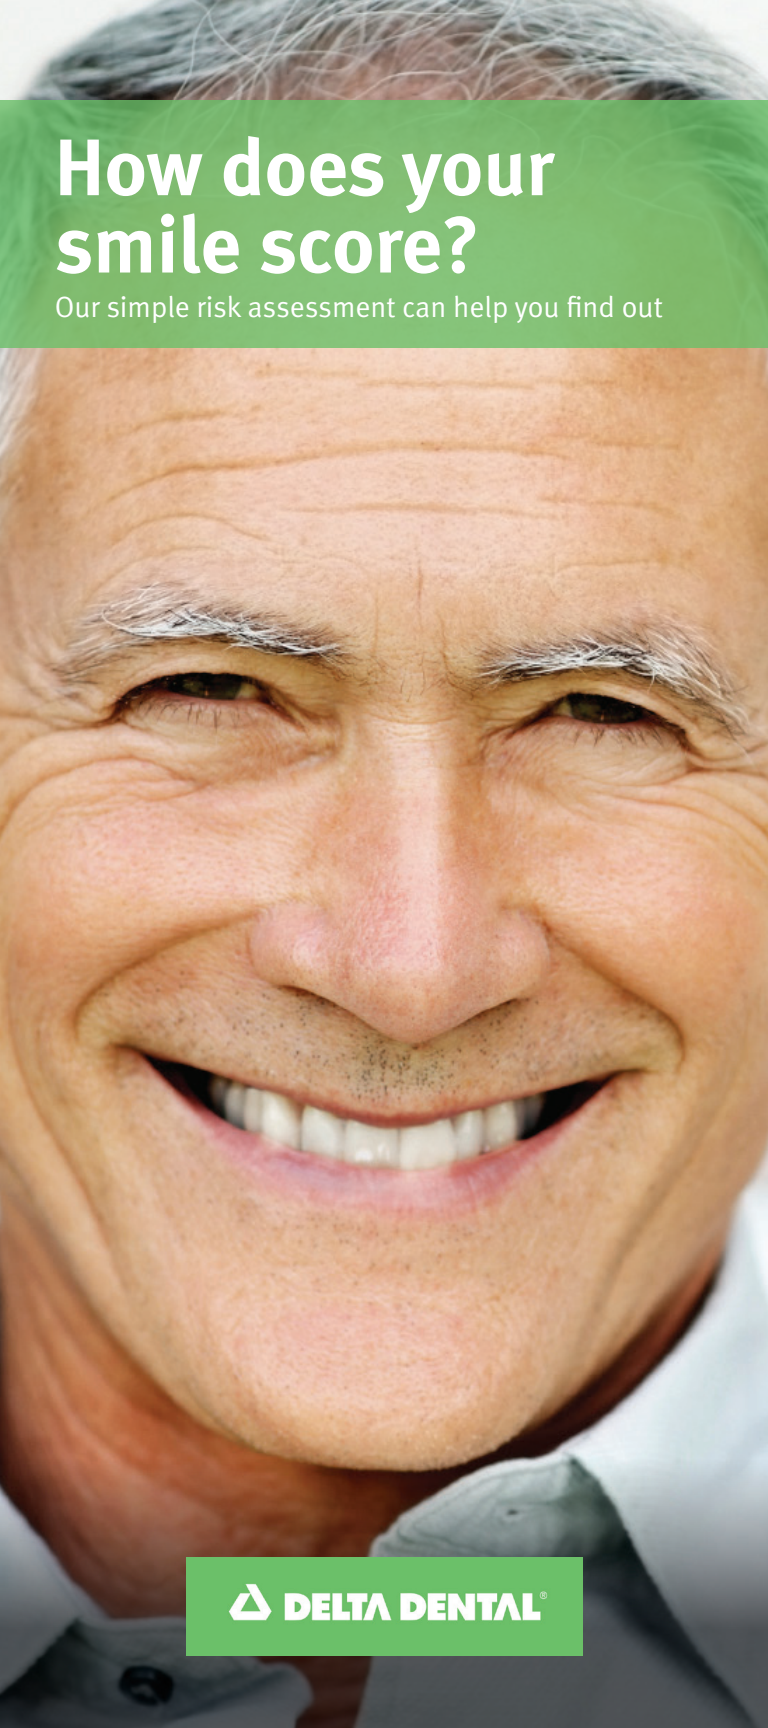
How does your smile score?

Our simple risk assessment can help you find out



DELTA DENTAL®

The better your oral health is, the healthier you are

Delta Dental knows that you are doing your best to keep your mouth healthy. That's why we want to help you assess your risk for diseases and take steps to prevent or treat them.

1. Answer some simple questions about yourself and your oral health.
2. Print your personalized myDentalScore report and schedule an appointment with your dentist.
3. Your dentist will take a look at your results and, if needed, help you create a treatment plan.

Summary

The following is a report summary

What does the Risk Score mean?

Your Risk Score describes the chance your health will get worse **without** good home and professional care.

What does the Disease Score mean?

Your Disease Score describes how much care is needed to get you as healthy as you can be or to prevent another episode of disease.
