

Health Impact Program (HIP) is a voluntary wellness program available to all employees. The program is administered according to federal rules permitting employer-sponsored wellness programs that seek to improve employee health or prevent disease, including the Americans with Disabilities Act of 1990, the Genetic Information Nondiscrimination Act of 2008, and the Health Insurance Portability and Accountability Act, as applicable, among others. If you choose to participate in the wellness program you will be asked to complete a voluntary health risk assessment or "HRA" that asks a series of questions about your health-related activities and behaviors and whether you have or had certain medical conditions (e.g., cancer, diabetes, or heart disease). You will also be asked to complete a biometric screening, which will include screening for height, weight, blood pressure and a blood test – lipid profile – including cholesterol, glucose, and an optional Prostate Specific Antigen (PSA) and Hemoglobin A1C screens. You are not required to complete the HRA or to participate in the blood test or other medical examinations.

However, employees who choose to participate in the wellness program will receive an incentive of up to \$200 for completing 500 activity points. Although you are not required to complete the HRA or participate in the biometric screening, only employees who do so will be eligible to receive the Health Impact incentive.

Additional incentives of prize drawings may be available for employees who participate in certain health-related activities or events or achieve certain health outcomes if applicable. If you are unable to participate in any of the health-related activities or achieve any of the health outcomes required to earn an incentive, you may be entitled to a reasonable accommodation or an alternative standard. You may request a reasonable accommodation or an alternative standard by contacting Wellness at wellness@azdoa.gov.

The information from your HRA and the results from your biometric screening will be used to provide you with information to help you understand your current health and potential risks, and may also be used to offer you services through the wellness program, such as health coaching. You also are encouraged to share your results or concerns with your own doctor.
