ADOA Benefit Options Wellness 2009 Flu Vaccine Program

ISSUE/QUESTION  
2009 Flu Vaccine Program Delays

ANSWER

There is currently a delay in seasonal flu vaccine shipments due to the production of swine flu (H1N1) vaccine. The delayed shipments have caused a limited supply of seasonal flu vaccine. As a result, Benefit Options Wellness has been forced to cancel some work site flu clinics and access to Healthwaves public clinics has been suspended until further notice.

All other scheduled work site flu clinics are subject to flu vaccine availability in the coming weeks. Please check the Benefit Options Wellness website regularly for updates, cancellations, postponements, etc.
