

Tuning in to Hunger & Fullness

We often do not realize that our bodies naturally support us in achieving and maintaining an optimally healthy weight through subtle signals and sensations. In this session, we will learn how to tune in to these subtle indicators of hunger and fullness, and how to discern between physical, emotional, and mental hunger so that we may increase our ability to respond to these signals more effectively.

In Tuning in to Hunger & Fullness, you will begin to:

- Have a basic understanding of mindfulness
- Understand how mindfulness can be useful as a foundational tool in weight management
- Learn to be more sensitive to the more subtle signals of hunger and fullness
